

## Setup Remote Access via P2P using Optiview VMS

## **Pre-Requisites**

- SN Number of device located on bottom of device recorder. Can also be located from the local menu of the recorder under menu -> system info or from Web service page then go to Setup -> Network -> P2P
- P2P must be enabled from the main menu of the recorder under Settings -> Network -> P2P or from Web Service under Setup -> Network -> P2P.

## Step by Step Instructions

1. Locate the serial number of your NVR or DVR. The serial number can be found at the following locations:

On the underside or side of the unit

In the web interface, under Info->Version

On the system interface under Main Menu->Settings->Network->P2P

On the system interface under Main Menu->Info->System->Version

2. Launch Optiview VMS . (Default credentials are admin:Admin1.0)

User Name: admin
